

Broad spectrum anthelmintic paste for goats and sheep.

Oralject
GOAT AND SHEEP WORMER

WHAT IS **ORALJECT GOAT AND SHEEP WORMER?**

- ✓ The easiest way to worm small numbers of goats or sheep
- ✓ Contains morantel citrate
- ✓ Easy to use dial-a-dose applicator
- ✓ Economical
- ✓ Safe

WHY CHOOSE **ORALJECT GOAT AND SHEEP WORMER?**

- 1. Contains morantel citrate**

Morantel citrate is a broad spectrum wormer that controls the gastrointestinal worms that are most likely to cause problems in goats and sheep kept in small areas.
- 2. Easy to use**

Oralject Goat and Sheep wormer comes in a convenient dial-a-dose applicator. This means that you just have to dial up the dose on the tube and then get straight into drenching your goats or sheep. There is no need for expensive drench equipment like guns and backpacks. Once you are finished there is no drench gun to clean and oil and no chemical drums to dispose of.
- 3. Economical**

Don't waste money on large drums of drench that will expire before you finish them. With Oralject Goat and Sheep Wormer you have the right amount of drench for your small size flock. Each tube treats up to six lambs or two average sized sheep/goats or one large sheep.
- 4. Safe for use on young, stud and pregnant animals**

The risk of drench liquid going into the lungs is avoided with the Oralject system. You can treat all of your goats or sheep and have peace of mind that you are administering the drench correctly.

WHEN TO USE **ORALJECT GOAT AND SHEEP WORMER**

- 1. Worm only when needed.**

Ask your animal health care professional about the best times to drench and monitor your animals.

HOW TO USE **ORALJECT GOAT AND SHEEP WORMER**

1. Dose at 1mL/3kg bodyweight. Ensure you weigh your animals to get the correct weight for dosing.
2. Turn the top ring until the required dose setting appears on the left margin of ring.
3. Insert the nozzle into the animal's empty mouth and deposit the paste on the back of tongue.
4. Lift the animal's chin and hold its mouth closed for a few seconds to ensure that the full dose is swallowed

INDICATIONS

Oralject Goat and Sheep Wormer is effective against susceptible mature and immature roundworms in sheep and goats, including benzimidazole resistant strains.

Barber's pole worm	<i>Haemonchus contortus</i>
