

# Anitone

for animal vitality

*“I tried out Anitone on a very poor eater. She started eating well after about a week and at her first start after being on Anitone, broke her maiden”*

- Jarrod Austin, Warwick Farm Trainer

## Gets your animals the healthiest they've ever been!

### Benefits of Anitone

- Supports Digestive effectiveness
- Can help stimulate appetite
- Provides 60 chelated essential minerals in a readily available organic form
- Reduce stress in livestock after mustering weaning & transportation
- Assists introduction to lot-feeding during feed changes
- Can alleviate symptoms of acidosis, laminitis, grain poisoning.

Anitone is the only liquid supplement available for animals with such a comprehensive range of ingredients. Containing numerous essential trace minerals and vitamins, such as selenium, copper and cobalt, as well as Vitamins A, D and E and a range of amino acids known to optimise metabolism. Anitone is unique as it is naturally fermented in a brewing process, which makes it highly palatable and attractive to animals, even when they are jaded, sick or stressed.

Anitone can help to bridge the gap between processed feeds and poor pasture. Anitone is an ideal supplement for horses under stress of training, performance, travel, pregnancy, lactation or growth. It is an ideal supplement to boost appetite and condition in weaning foals, or aged horses as well as sport horses in training and travelling to competitions.

### Anitone - The Greater All-Rounder

No need to keep a wide variety of dietary supplements, Anitone is such a versatile product that is appreciated by all who keep animals, whether they are large or small. It's the all-in-one package.

#### When to use Anitone:

- As a general tonic to ensure all round good health
- Poor pasture and feed conditions or changing feed conditions
- Before, during and after travelling to reduce stress
- To stimulate appetite
- During health stress events

*“I tried Anitone on a filly who was hard to get fit, because she kept going off her feed when we put the hard work into her. She's definitely improved appetite-wise since I started her on Anitone a week ago. I'll be ordering some more Anitone for other horses in my stable”*

- Tim Martin, Group 1 Winning Trainer

# Directions for use:

Anitone is water soluble and is highly palatable to most animals. It is designed to be given orally in a versatile number of ways to suit any animal owning pursuit

- May be given straight over the tongue.
- May be poured over feed rations - either mixed into dry or moist food rations.
- Where suitable for some species may be added to drinking water, providing there is a good flow through the watering system.

Anitone is safe for pregnant and lactating horses. Anitone can be administered to horses as young as 1 day old.

## Complete Full Analysis | Anitone

Anitone Analysis					
Ash (Mineral content)	10%		Vitamin E		6200iu/L

Potassium	2000ppm	(2g/L)	Carotene		42mg/L
Sodium	3%	(30g/L)	Choline		7mg/L
Calcium	1900ppm	(1.9g/L)	Cyanocobalamin (B12)		425ug/L
Magnesium	1500ppm	(1.5g/L)	Folic Acid		125mg
Sulphur	1600ppm	(1.6g/L)	Vitamin D3		2300iu
Cobalt	12ppm	(12mg/L)	Amino Acids (%)	Total 3%	
Boron	13ppm	(13mg/L)	Aspartic	0.47%	
Iron	300ppm	(300mg/L)	Threonine	0.19%	
Manganese	60ppm	(60mg/L)	Serine	0.19%	
Zinc	32ppm	(32mg/L)	Glutamic Acid	0.50%	
Copper	850ppm	(850mg/L)	Proline	0.17%	
Molybdenum	5ppm	(5mg/L)	Glycine	0.20%	
Selenium	15ppm	(15mg/L)	Alanine	0.27%	
Iodine	120ppm	(120mg/L)	Valine	0.21%	
Alginate	650g/kg		Cysteric Acid (Crystine)	0.11%	
Ascorbic Acid		(10mg/L)	Methionine	0.07%	
Thiamine (B1)		375mg/L	Isoleucine	0.14%	
Retinol (A)		155,000iu/L	Leucine	0.25%	
Riboflavin (B2)		150mg/L	Lysine	0.18%	
Pyridoxine (B6)		525mg/L	Arginine	0.13%	

## Dose Rates

### Horses over 300kg

- 60mls daily

### Horses/Ponies under 300kg

- 30mls daily

### Pre-Performance Booster

- 80mls orally night before

(NIL WITH HOLDING - WILL NOT SWAB)

### STRESS RECOVERY DOSE

- 80mls daily

**“I’ve got a two year old that we’ve been struggling with for months to get her to eat. Within a week of Anitone she was cleaning up her feed”**

**- Gary Portelli, Group 1 Winning Trainer**

## How is Anitone made?

Anitone is derived from a careful manufacturing process that involves the fermentation of mineral rich plant extracts and takes over 3 days to brew. The vitamins and minerals contained in Anitone are therefore all plant derived, complexed into large molecules called “Phytocomplexes”, which once fermented are readily broken down by gut microflora. Due to the high availability in this form, a high percentage of minerals are readily absorbed from the gut. There are over 60 minerals in Anitone, with good levels of Vitamin A, D and E plus a range of amino acids essential for growth and healthy metabolism. Additionally, Anitone contains a wide variety of plant origin volatile oils, chlorophyll, sterols, growth factors, alginates, and humic and fulvic acids which provide a further array of background nutrition.

There really is no other product like Anitone, that is so well priced and safe to use in all food producing and competition or show animals. It is a genuine multi tasker and very handy to have in the shed.
