ACELEPRYN

Season long grub control for perfect greens

This year you can apply your insecticide control as usual – fully suited-up to protect yourself against the product you're using.

Or you could apply your insecticide control in a far more comfortable manner using ACELEPRYN Turf Insecticide.

ACELEPRYN is the industry leading insecticide that delivers more than just outstanding grub control.

- A single application of 210 mL per green gives you up to 6 months protection
- ACELEPRYN is exempt from poison scheduling which means that there are no specific PPE requirements for spraying
- ACELEPRYN controls a wide range of insects including African Black Beetle, Argentinian Scarab and Billbug larvae plus several species of caterpillars (Armyworm, Cutworm, Webworm)

For more information ask your Syngenta Agent or go to www.greencast.com.au
