

NUFARM'S WEEDMASTER PRE-HARVEST REGISTRATIONS.

Dual Salt Technology

Excellent compatibility

Fast brownout

Excellent performance on hard to kill weeds

	CROP	WEEDMASTER DST	GLADIATOR CT	SHIRQUAT (Annual ryegrass control only)
REGISTRATION	Canola	1.4 - 4.1 L/ha	Not registered	Not registered
	Hay and silage including Oaten hay	1.4 - 4.1 L/ha	Not registered	Not registered
	Wheat	1.4 - 4.1 L/ha	Not registered	Not registered
	RR Cotton	1.04 - 2.2 L/ha	Not registered	Not registered
	Cotton	0.96 - 1.9 L/ha	1 - 2 L/ha	Not registered
	Chickpeas [#]	580 mL - 2.1 L/ha	Not registered	400 or 800 mL/ha
	Lentils	780 mL - 2.1 L/ha	Not registered	400 or 800 mL/ha
	Field peas	365 mL - 2.1 L/ha	Not registered	400 or 800 mL/ha
	Faba beans	365 mL - 2.1 L/ha	Not registered	400 or 800 mL/ha
	Sorghum	1.15 - 2.3 L/ha	1.2 or 1.6 L/ha	Not registered
	Barley (except malting barley)	1.9 L/ha	Not registered	Not registered

[#] Addition of Associate for improved weed control is also registered

TO AVOID GRAIN REJECTION AT RECEIVAL.

Grain buyers are becoming more stringent in the use of crop protection products. Many delivery sites are now requesting growers to sign declarations to ensure correct registered applications have been used. Grain that does not meet these requirements can be rejected at receival.

TO MINIMISE THE RISK OF EXCEEDING PESTICIDE RESIDUE LEVELS:

- Only use products registered for that use.
- Use only the rates on the label.
- Observe the withholding periods or the harvest intervals.
- Ensure any statutory declarations that are signed are factual.

GETTING THE BEST OUT OF PRE-HARVEST HERBICIDES

Nufarm has completed extensive trials to establish new glyphosate MRLs (maximum residue levels) on export grains which has now allows you use Nufarm's weedmaster DST pre-harvest.

This means that Nufarm's weedmaster DST has the broadest registration of preharvest applications of any glyphosate product!

In a nutshell

- Effective in reducing weed seed set.
- Excellent pre-harvest maturity aid.
- It gets better – it is the only glyphosate registered for pre-harvest use in feed and food grade barley.

The easy solution

Unlike Nufarm's weedmaster DST, not all knockdown products are registered to control weeds or to reduce weed seed set when used preharvest. You should always check the label before using a product.

Ticking all the boxes

Grain handlers now need declarations showing the crop protection products used during the process of planting, growing and storing the grain. Our new Nufarm's weedmaster DST registration helps you tick all the boxes.

- Sign your declaration at receipt points.
- Make sure all this information is correct to keep our food supply chain and export markets safe.
- These declarations are a legal document. You need to understand the consequences if false information is provided.
- Contact your grain receiver if you'd like to know more.
