# TECHNOTE A ROBUST AND ECONOMICAL KNOCKDOWN MIX

**Nail 600EC used in combination with Shirquat 250 increases the rate of brownout on broadleaf weeds, broadens the weed spectrum and most importantly improves control of some tough weeds like marshmallow, capeweed and salvation jane.**

**The low use rates due to the highly concentrated formulation of Nail 600 makes it even easier for growers to carry the product on the boomspray or spray truck and add to the spray tank on the go.**

Nail 600 is the ideal mixing partner for growers using Shirquat. It gives growers improved weed control over straight Shirquat or other paraquat products, especially on broadleaf weeds.

It also is a great addition to tidy up weeds pre-sowing after glyphosate applications. Shirquat tends to be weaker on broadleaf weeds that may have escaped or germinated since spraying glyphosate.

## FEATURES AND BENEFITS

- Can be used in all pre-sow situations or in fallow.
- No plantback restrictions - crops can be sown without delay.
- Improves resistance management Group G and L herbicides.
- Rapid foliar uptake - rainfast in 1 hour.
- Spray weeds when young and growing actively (2 to 6 true leaves).
- Always add Supercharge Elite @ 0.5% or an equivalent oil.

For more information on Nail 600, contact your local Nufarm Territory Manager.
