

PRODUCT INFORMATION

WSD FLY STRIKE POWDER

To Control Flystrike and for Wound Dressing for Animals

Product Description

WSD FLY STRIKE POWDER is a treatment for blowfly strike of sheep and a wound treatment for livestock.

Type of Preparation

WSD FLY STRIKE POWDER is a ready-to use powder for topical application to struck areas or as a wound dressing containing diazinon 15g/kg, piperonyl butoxide 0.8g/kg, and pyrethrins 1g/kg.

Indications

Sheep and other Livestock:

To treat or prevent blowfly strike, including after dehorning, mulesing or other wounds

Milking Sheep: Should not be used in sheep producing milk for human consumption.

Dosage

Always refer to the label.

Shear wool or clip hair from the affected parts. Apply powder to the wound, introducing it into any cavities beneath the skin. Dust the wool and skin bordering the strike, particularly areas between skin wrinkles. After marking, mulesing and dehorning, apply liberally to the affected area.

Advice On Use

- It is important to coat the area thoroughly.
- Following fly strike, re-treatment of the affected area may be required.
- All preparations containing diazinon should be treated with CAUTION.
